

# The Fury® electric water heater line is engineered for longer life - resistored heating elements and premium grade anode rod

# Efficiency

- · Isolated tank design reduces conductive heat loss
- · High efficiency resistored heating element for added protection to prolong anode rod and tank life

### **Performance**

- FHR: 42 99 gallons, based on gallon capacity
- Recovery rate is 21 gallons at a 90 degree Fahrenheit rise\*\*

# **High Efficiency Models Feature**

- High performance and lower operating cost
- · Exclusive Rheemglas tank lining resists corrosion
- · ASME rated temperature and pressure valve
- R-Foam Polyurethane foam insulation for superior heat retention
- · Maximum tank working pressure of 150 PSI (10 BARS)
- Factory tested @ 300 PSI
- Anode rod equalizes aggressive water action and prolongs the life of the water heater

- · Electric junction box located above heating elements for easy installation
- Over-temperature protector cuts off power in excess temperature situations
- Automatic thermostat keeps water at desired temperature

#### Plus...

 EverKleen<sup>™</sup> self-cleaning device fights harmful sediment build-up with a high-velocity spiraling water stream helps operating efficiency by saving energy, money and improving tank life

- Brass drain valve
- · Temperature and pressure relief valve included
- · Stainless Steel or Incoloy Heating elements available

# **Fury**

<sup>\*</sup>Water heater dimensions prior to installing insulation blanket that is included with water heater.

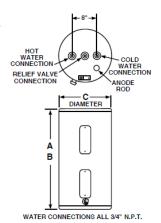

81SVB30-2 - The insulation blanket adds 1-1/2 inches to tank height and 3 inches to tank diameter.

 $82 SVB 40 - 2 - The insulation \ blanket \ adds \ 1 \ inch \ to \ tank \ height \ and \ 2 \ inches \ to \ tank \ diameter.$ 

- · Heaters furnished with standard 240 volt AC, single phase non-simultaneous wiring, and 4500 watt upper and lower heating elements.
- If heating elements of different wattages than those shown are demanded by zone requirements, they must be specifically requested.
- Single element models available on special order (6000W max.). Substitute "-1" for "-2" in model number.
- Special Wiring Options A limited number of special wiring options are available. Consult factory for price and availability.
- · All models equipped with heat traps.

\*\*Recovery = wattage/2.42 x temp. rise °F. Example: <u>4500W</u> = 21 GPH  $2.42 \times 90^{\circ}$ 

\*\*Recovery calculations used are based on 4500 watt elements used in non-simultaneous operation.
