

# Static Pressure Chamber

Static pressure chamber

Seal design of static pressure chamber. Reduce air volume leakage under high static pressure (same as Japan and South Korea brand)

Static pressure chamber

RIAL-018TH00-K  
RIAL-024TH00-K  
RIAL-030TH00-K

# Flexible Air Intake

Air intake from rear is standard, from bottom is optional. Suitable for different installation requirement.

RIAL-018TH00-K  
RIAL-024TH00-K  
RIAL-030TH00-K

## Fresh air intake

Reserved fresh air intake hole. It is available for connecting fresh air duct.

It is allowed max. 10% fresh air for the indoor unit.

Fresh air intake hole

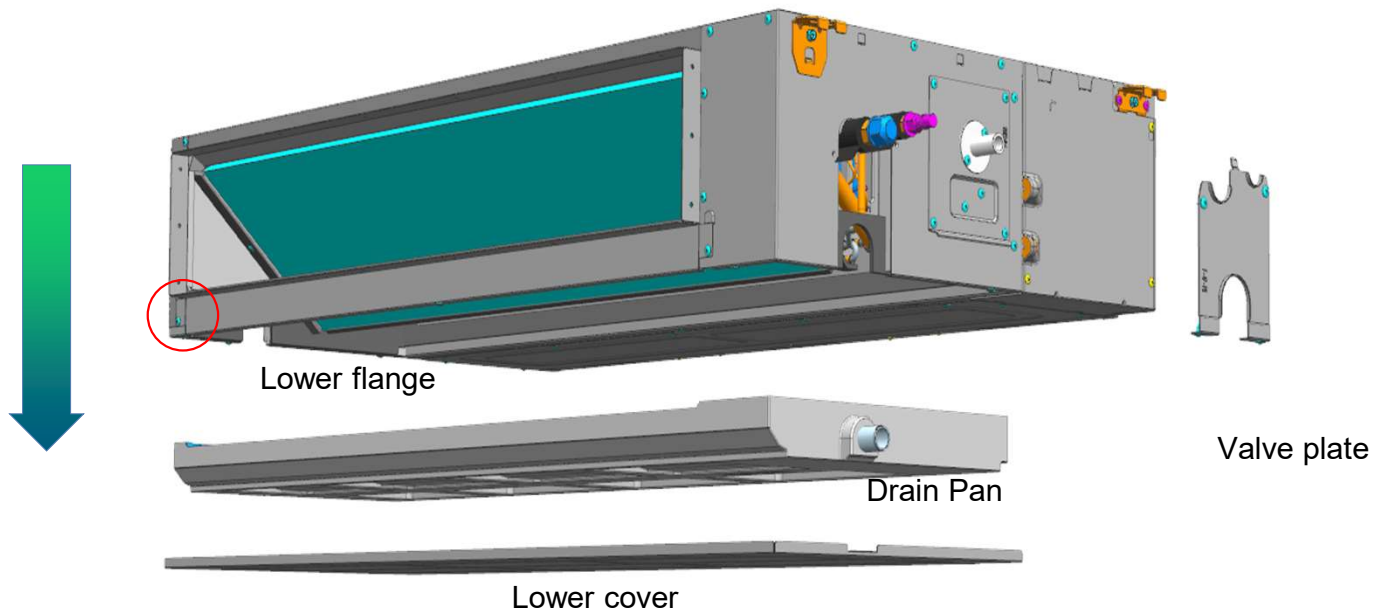

RIAL-018TH00-K  
RIAL-024TH00-K  
RIAL-030TH00-K

# Independent Flange

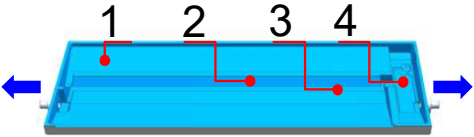

Simple structure ensures that the whole machine is repaired and cleaned without destroying the installed air duct.

RIAL-018TH00-K  
RIAL-024TH00-K  
RIAL-030TH00-K

# Drain Pan Design

Brand	Special Drain Pan Design
Structure	 A diagram of a blue drain pan with four numbered steps (1, 2, 3, 4) along its length. Red lines connect the steps, and blue arrows at the ends indicate drainage direction.
Material	Blister (PVC) (plastic suction)
Drainage direction	<b>2 way</b>
Conclusion	4-step Drain Pan, Drains quickly and completely; Less storage water

## Optional Water Pump

The water pump is optional for duct unit with the head of delivery is up to 700 mm, it is flexible for installation.

700 mm

RIAL-018TH00-K  
RIAL-024TH00-K  
RIAL-030TH00-K

## Optional Water Pump

The optional built-in pump can lift condensing water up to 700 mm high from the drainage pan.

700 mm

RIAL-036TH00-K  
RIAL-042TH00-K  
RIAL-048TH00-K  
RIAL-055TH00-K

# Inverter Compressor

DC inverter compressor & DC fan motor have good efficiency in part load condition, more energy saving ;

## Refrigerant Cooled & Insulated PCB Box

It helps to reduce the operation temperature of PCB by 30°C, prevent the PCB from overheating to make sure it can run steadily, also prolong its service life.(Only for 36/42/48/55K Outdoor Unit)

R&D Center

Smart factory—self-produced

## Wide Operation Range

The unit could operate perfectly between 55°C in hot summer and -5°C in cold winter, making a comfortable environment.

## Auto Restart Function

The AC can automatically memorize the operation setting when power is cut off accidentally. It can return to previous setting when power resumes.

# Flexible Installation

Long piping / high drop between IDU and ODU, flexible installation

Piping Length (m)		
Capacity (K Btu/h)	Max. Piping Length L1	Max. Piping High H1
18/24K	30 m	15 m
36/42/48/55 K	50 m	30 m

# Multiple Protection

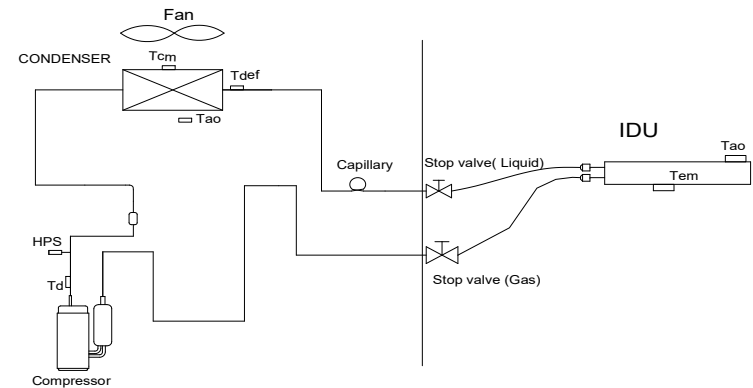

## System protection

- Discharge temperature too high protection
- Condenser temperature too high protection
- High pressure protection
- Temperature sensor protection
- Compressor overloading protection
- Phase sequence protection
- Communication failure protection
- Anti-freezing protection
- Anti-cold air protection

## Drive module protection

- High power consumption protection
- Over current protection
- Over temperature protection
- High or low voltage protection
- PCB anti-condensation protection

# Controller Options

Series		Standard	Optional 1	Optional 2	Optional 3	
Duct		 <b>XK-05</b>	 <b>YK-K</b>	 <b>YK-H</b>	 <b>XK-06</b>	
IDU Series	Photos	Wired controller signal	CC-02	MODBUS	WIFI	Room card control (dry contact)
Duct		RS485	✓	✓	✓	✓

# Wired & Wireless Controller

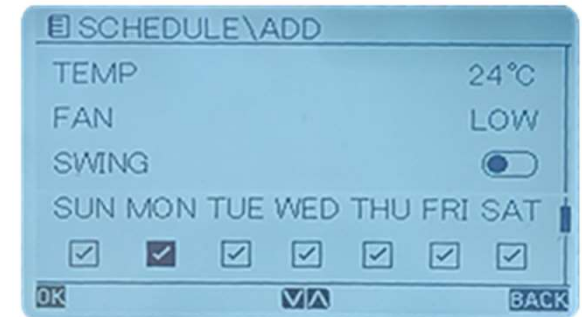

New XK-06 wired controller.

XK-06 11222020000068

### ➤ Weekly timer

### ➤ Room temperature (Optional)

## Central controller

- Control up to 64 IDUs.
- Zone control function.
- Weekly timer.
- Touchscreen & easy operation.
- Running status monitoring.
- Error code display.
- Fire alarm.

# MODBUS

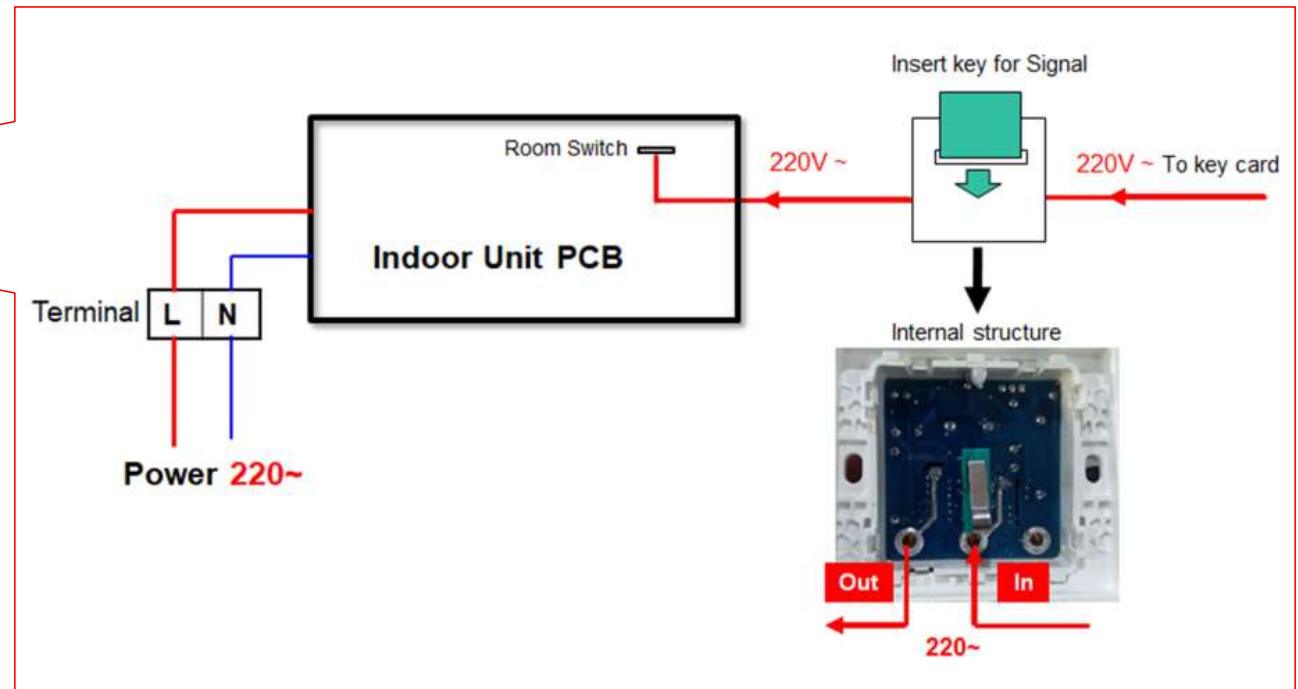

Address	Content	Access type (Write/Read)
0	1# indoor unit existence or not	R
1	1# indoor unit ON/OFF state	W/R
2	1# indoor unit UP/DOWN swing	W/R

10	1# indoor unit fan speed lock	W/R

BMS system

## Room Card Control

- Insert card , Indoor unit can be controlled
- Remove card ,indoor unit keep off status, can not be controlled
